

APLD-80

单元式幕墙打胶机械流水线（地下式）

Glue Mechanical Assembly Line for Unit Curtain Wall (The underground line)

[性能特点 Product Features]

- 适用于各型幕墙板块的机械传输，传送平稳。
- 传输速度由变频器控制，实现精确调速。
- 操作工人可自由穿越流水线，用工少，效率高。
- 撑杆表面粘贴有橡胶垫，确保幕墙型材表面不被磨损。
- 需前期制作地下基础。
- Suitable for mechanical transmission of various types of curtain wall plate. And the transit is steady.
- The transmission speed is controlled by the frequency converter to realize the precise speed regulation.
- Operating workers can freely cross the assembly line. Few labor and high efficiency.
- There are rubber pads on the surface of support bar to avoid surface wear.
- Need to prepare underground foundation in the early stage.

电源	Power supply	380V 50Hz
流水线长度、宽度	Length/Width	80m/1800mm
工作面高度	Worktable height	750mm.
撑杆工位间距	Sliding body spacing	800mm
承载幕墙板块单件最大重量	Max load(one piece)	5T
流水线速度(变频调速)	Speed(frequency control)	0.5m-3m/min
电机功率	Motor power	5.5kw
